

Mechanical Contracting Products

Regulators

Regulators available for all types of applications, from the smallest appliance model to the largest utility style. Let ETTER review your equipment schedual and will will take it from there. Indoor ventless applications also available eliminating the need to install a vent line, saving money!

Meters

ETTER Engineering's expertise can provide you with an integrated data acquisition package. We will integrate all of your utility metering needs into one clean and concise package.

VFD's

State of the art variable frequency drives available for the most common motor horsepower and voltages. Designed specifically for HVAC applications. Available with optional by-pass controls along with numerous additional advanced features.

Shut Offs

Gas safety shut off valves available for all types of burner, industrial, and process heating applications. Whether indoor or outdoor, high pressure or low, classified location or not, ETTER is your source for all your safety shut off needs.

Switches

Pressure, temperature, flow, level - whatever type of switch you are looking for, ETTER can assist you. We stock many makes and models. Ask us about the FM approved ventless gas pressure switches so you do not have to run the vent line.

Specialties

ETTER is your source for all those specialty valves. Whether you are looking for FM approved check valves, fire-link valves, or even Seismic shut off valves, we are here to service your needs. Specialties are "common" for us!

Services

ETTER Engineering can provide a full compliment of services including design, design-build and pre-packaged systems and controls.

Mechanical Contracting Services

Engineering and Design

Here at ETTER Engineering we pride ourselves on the technical support capabilities we have to offer. Our experience in the gas, combustion, and controls industry provide a diverse resource pool for you to draw from.

Gas Boosters

Gas Boosters have been a focus here at ETTER for over 60 years. Whether you are looking for booster parts or a complete packaged booster system, ETTER is your source. In addition we pair our boosters with only state-of-the-art PLC touch screen controls designed in our UL panel shop.

Control Systems

Our control systems are engineered, designed and fabricated in our in-house UL certified shop by our highly experienced controls engineers. Control system capabilities include state-of-the-art PLC based controls with touch-screen operator interface.

Piping Systems

Piping systems for custom applications are a routine part of our business. Whether you are looking for a simple burner valve train or a complex regulating-metering station, ETTER is your source for technical piping packages.

Burner Controls

ETTER offers burner controls serving the industrial and commercial markets. The new SIEMENS linkage-less burner controls package is ideal for retrofit jobs. Kromschroder pulse fired burner systems are ideal for some of the toughest furnace applications. Let us partner together, we can provide the know-how for all your burner control needs.

Sub-Meter Systems

Here at ETTER we always provide you with the expertise needed to create the intergrated data acquisition package you desire. We will integrate all your project's utility metering into one clean and concise package, even on the web.

Products

ETTER Engineering provides a full line of gas and combustion related components as well as any parts you may need to support your industry. We ship daily.
