ETTER ENGINEERING MOVES TO NEW FACILITY IN BRISTOL, CONNECTICUT

BRISTOL, Conn. – With much pride and excitement, ETTER Engineering announced it has moved to a new, larger facility to accommodate the company's prodigious growth over the past several years. Located in Bristol, Connecticut, the facility is over three times as large as ETTER's old headquarters, and will provide much needed breathing room in terms of both shop as well as office space.

After many months of searching, and several more of planning and construction, ETTER finally made the big move at the end of January, 2010. The new facility, located merely a stone's throw from ESPN's world headquarters, feature state-of-the-art work cells for the company's manufacturing division, along with advanced R&D and testing facilities.

As a leading manufacturer of gas boosters, UL-Approved control panels, packaged heaters, packaged burners, and other custom industrial process heating equipment, ETTER has been serving the Northeast region and beyond since 1940.

Friends and customers looking to contact ETTER can reach them by dialing toll free: 1-800-444-1962, or by calling 860-584-8842. The company's new fax # is 860-584-8612. The new mailing/shipping address is 210 Century Drive, Bristol, CT 06010.

About ETTER Engineering
