

## Advanced Control Systems - SCADA

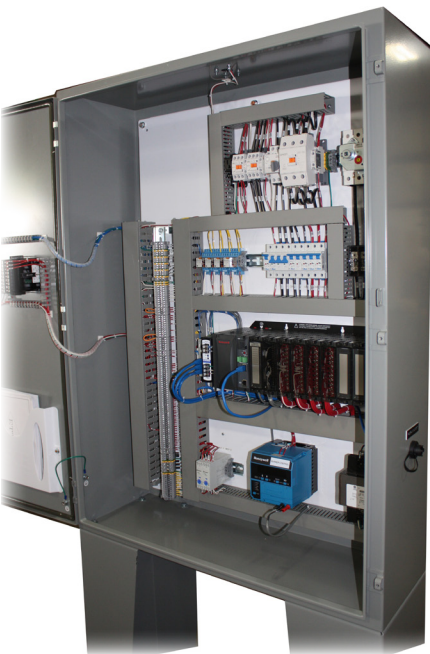

ETTER Engineering designs and maintains advanced SCADA Control Systems. We have the ability to integrate new or existing equipment into SCADA hardware and software, providing a single point-of-use for the operators. This can save significant time when troubleshooting problems, gives the operators a clear view of plant processes, and ensures your process is in compliance with both Regulatory and Non-Regulatory reporting requirements.

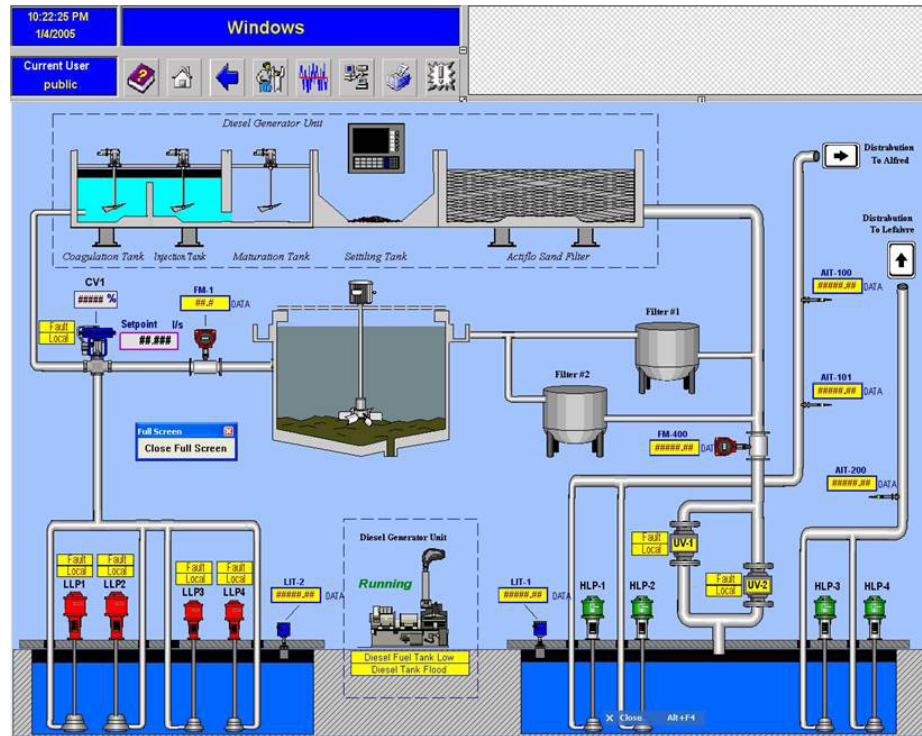

### Why ETTER?

- Turnkey SCADA Solutions
  - Control & Data Reporting in secure formats
  - Custom Programming
  - Upgrade, Maintain & Expand existing systems
  - Over 15 years of SCADA experience
  - Proficient in AMS2750 & CFR-21
- **EXPERIENCE MATTERS** - We've been around since 1940 and have decades of panel building experience. We build hundreds of Control Panels each year!
- **INNOVATION MATTERS** - Our engineers and electrical team are always abreast of new technologies and innovations.
- **LOCATION MATTERS** - We are centrally located in Bristol, Connecticut with easy access to New England, New York, and New Jersey.

Call Tom Etter at 860-584-8842 today for a competitive quote!
